

Plaster mold release

Range of specific release agents for the production of plaster moulds. Suitable for resin/gypsum and gypsum/gypsum. Best separation of the plaster negative cast from the master mould, with unaffected absorbency of the plaster moulds.

Form SOAP

Potash SOAP

The advantages:

- Works on all types of case molds.
- Neutral pH.
- Case mold remains clean after demolding.
- Unaffected absorbency inside the plaster molds.
- Concentrated, to be diluted with water.
- Application by brush or spray.
