

SPAGLESS Capillary products

The advantages of the SPAGLESS CAPILLARY SYSTEM 4M are:

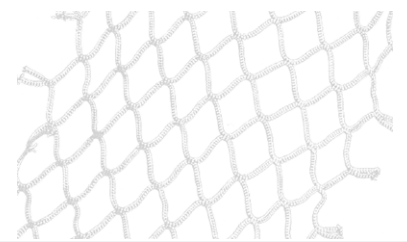

- Suitable for both low pressure casting and medium pressure casting.
- Combining high absorption rate for efficient skin forming and optimised air permeability for fast dewatering time.
- New working molds ready for slip casting immediately after demolding.
- No case mold modification required.
- Improved productivity, several castings/day instead of one.
- Working moulds are always dry, no need for drier/kiln.
- Reduction of working molds, reducing solid waste costs.
- Average life of working moulds increases up to 20%.

Blue glass fiber hose \varnothing 5 or 6 mm

Standard glass fiber hose \varnothing 5, 6 or 8 mm

Polypropylene net 45x3 45x3 cm

Support for SPAGLESS fiber hose

SPAGLESS air connector
