

# SPAGLESS SWORD Products

## The advantages of the SPAGLESS SWORD SYSTEM 4M are:

- Combining high absorption rate for efficient skin forming and optimised air permeability for fast dewatering time.
- Suitable for both low pressure casting and medium pressure casting.
- Average life of working moulds increases up to 20%.
- Improved productivity, several castings/day instead of one.
- Working moulds are always dry, no need for drier/kiln.
- New working molds ready for slip casting immediately after demolding.
- Reduction of working molds, reducing solid waste costs.
